Weather Alert Radio Set-Up Procedures WR-100 Midland

Battery Installation

Three (3) AA alkaline batteries are used to provide back-up power to the Weather Alert Radio. The battery compartment is located in the bottom of the radio. DO NOT USE RECHARGEABLE BATTERIES.

Programming The Radio Frequency (Page 12-13 of Owners Manual)

- Turn **ON** Weather Radio (side of radio)
- Press **MENU**
- Press **UP** directional arrow until **CHANNEL** is displayed
- Press **SELECT**
- Press up directional arrow until you hear the broadcast of your station, then press **SELECT**

Note: you will hear a voice when you have found your station, static is heard on channels not received in your area. Page 14 of Owners Manuals will list broadcast frequencies.

- Press **MENU** to close menu mode.

Programming Voice Alert (Page 20 of Owners Manual)

- Turn **OFF** Weather Monitor for silent programming
- Press **MENU** button to open menu options
- Press **UP** arrow to scroll through menu options until **ALT TYPE** (Alert Type) is displayed, then press **SELECT**
- Press **UP** arrow to scroll through the following alert types (Display, Voice, Tone)
- Press **SELECT** to choose the Alert Type desired
- Press **MENU** to close menu mode.

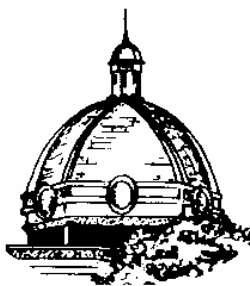

Programming 'ANY' SAME Alert (Page 19 of Owners Manual)

Weather Monitor comes preprogrammed to receive NWS Weather & Hazard Alert transmissions for any and all SAME county codes within range. If you want to receive all Weather & Hazard Alert transmissions within reception range, leave your Weather Monitor set to 'ANY'. Note: Follow instructions listed under Section B, Page 18, if resetting monitor to 'ANY' from programmed county codes (single/multiple).

Programming Specific County Information (SAME #--Page 16-19 of Owners Manual)

Midland Testing Information (Page 25 of Owners Manual)

The Midland WR100 radio has been updated to have the radio respond to the weekly and monthly test with **only** the visual alert. During the test, the Advisory LED will light up and the "Weekly Test" or "Monthly Test" message will be visible on the display. The radio will **not** sound the audible alert tone to avoid giving the impression of an actual alarm. The visual response to the test is confirmation that your radio is working properly.

Maxon 80 Weather Radio Testing Information

Monthly Test: Every Wednesday between 11:00 a.m. and 11:59 a.m.

Special Testing: The first Wednesday of every odd numbered month the test will be conducted between 8:45 a.m. and 9:00 a.m. There will be no test between 11:00 a.m. and 11:59 a.m. on these Wednesday.
